

Connekt

ITS NETHERLANDS

LEAN & GREEN

Top Sector Logistics Program Secretariat: involved in scaling up implementation projects of more than 200 companies, focusing on areas including Synchronodal Transport, Cos Chain Control Centers, City Logistics, NLP, Human Capital and Supply Chain Finance projects

- The Steering Group: the number one platform in the Netherlands for dialog between public authorities, market parties and road users' representatives in the area of mobility information
- The 5 November Group: sets the course in the areas of traffic management and traffic information by publishing the 'Routekaart Beter Geinformeerd' op Weg (Roadmap 'Better Informed on the Road')
- Dutch Data Moves Mobility: the platform that aims to identify and capitalize on opportunities arising from the linking of ITS and logistics
- ITS International: C-ITS Platform gathers input from the Netherlands to help set the agenda at European level. Connekt organizes trade missions and represents the Dutch mobility sector during these, is a member of ITS Nationals and organizes the ITS Europe and World Congresses
- Standardization platforms: MOGIN (standardization of Dutch mobility information), BISON (12 standards applied by all urban and regional transport companies that allow up-to-date public transport information to be made available at stops and accessed via smartphones and the Internet) and DVM-Exchange (an open standard that facilitates communication between traffic control centers)
- ITS overview: up-to-date information on all developments in the area of ITS is made available online, as well as publications on the competitive position of the Dutch ITS sector
- Logistics: 337+ Lean & Green Logistics Pioneers have now achieved a total reduction in CO₂ emissions of more than 400,000 tons
- Personal Mobility: 140+ employers, representing more than 72,000 FTEs, are standing out from the crowd by taking efficient measures linked to the mobility of their employees
- Synchronodal: within Lean & Green Synchronodal, shippers in the region are working together and analyzing their cargo flows to allow these to be bundled in a sustainable way using synchronodal transport
- International: in addition to the national Lean & Green programs in Belgium, Luxembourg, Italy, Spain, Germany and the Netherlands, there is also a Lean & Green Europe program

Connekt

The independent network for smart, sustainable and social mobility of people and goods.

Where influential parties meet to combine their knowledge, creativity and dynamism.

Together we develop and implement tangible solutions that make the world a better place - ecologically and economically.

After all, together we are stronger, can achieve more and can make greater progress.

We welcome any party interested in contributing to our goals.

Membership

Widen your network to include professional contacts from the sector by participating in network events and study trips, both nationally and internationally.

Information on the latest trends and expertise in the areas of mobility and logistics.

Knowledge of Connekt's expert committees, platforms and communities, such as Smart City Embassy, ITS, Top Sector Logistics and Lean & Green.

A dedicated team of experts that is ready to answer your questions.

Een toegewijd team van experts, dat klaar staat om je vragen te beantwoorden.

Expand your network, share your knowledge, be inspired and get involved in mobility initiatives.
